

## CLAIM AMENDMENTS

Please amend the claims as follows:

1           **1.-15. (Previously Cancelled)**

2  
3           **16. (Previously Amended)** An illumination apparatus for LCD/organic displays to  
4 provide such displays with high intensity backlighting lights and providing a uniform  
5 display comprising:

6           a first panel containing a plurality of high intensity light sources LED lamps  
7 surrounded by a white background;

8           a diffuser panel placed in front of said first panel to soften light and provide a uniform  
9 appearance; and

          a LCD/organic display panel placed in front of said diffuser panel and being illuminated  
by the light from the diffuser panel to thereby provide an illuminated LCD/organic display.

1           **17. (Currently Amended)** The illumination apparatus for LCD/organic displays of claim  
2 16 wherein;

          the plurality of high intensity light sources on the first panel are LED lamps.

1           **18. (Currently Amended)** The illumination apparatus for LCD/organic displays of claim  
2 ~~[[17]]~~ **16** further comprising:

3           a cover is placed in front of said LCD/organic display panel for protection of the  
4 ~~generated display~~ LCD/organic display.

1           **19. (Currently Amended)** The illumination apparatus for LCD/organic displays of claim  
2 17 further comprising:

3           a cover is placed in front of said LCD/organic display panel for protection of the  
4 ~~generated display~~ LCD/organic display.

1           **20. (Previously Amended)** The illumination apparatus for LCD/organic displays of claim  
2 18 wherein:

3           said cover is made of clear polycarbonate glass.

4 a Frenzel lense panel placed between the first panel and the diffuser panel.

1 30. (*New Claim*) An illumination apparatus for LCD/organic displays to provide  
2 such displays with high intensity backlighting lights and providing a uniform display  
3 comprising:

4 a first panel containing a plurality of high intensity LED lamps surrounded by a  
5 white background;

6 a diffuser panel placed in front of said first panel to soften light and provide a  
7 uniform appearance; and

8 a LCD/organic display panel placed in front of said diffuser panel and being  
9 illuminated by the light from the diffuser panel to thereby provide an illuminated  
LCD/organic display.

31. (*New Claim*) The illumination apparatus for LCD/organic displays of claim 30  
further comprising:

a cover is placed in front of said LCD/organic display panel for protection of the  
LCD/organic display.

32. (*New Claim*) The illumination apparatus for LCD/organic displays of claim 31  
wherein:

said cover is made of clear polycarbonate glass.

33. (*New Claim*) The illumination apparatus for LCD/organic displays of claim 30  
wherein:

said diffuser panel is made of polycarbonate.

34. (*New Claim*) The illumination apparatus for LCD/organic displays of claim 30  
wherein:

said diffuser panel is made of glass.

**35. (New Claim)** The illumination apparatus for LCD/organic displays of claim **31** wherein:

said diffuser panel is made of polycarbonate.

**36. (New Claim)** The illumination apparatus for LCD/organic displays of claim **31** wherein:

said diffuser panel is made of glass.

1       **37. (New Claim)** The illumination apparatus of claim **30** for LCD/organic displays  
2 further comprising:

a Frenzel lense panel placed between the first panel and the diffuser panel.
